Subject: Microsoft Settlement

I am urging you to settle the Microsoft litigation against this United State icon.

We the tax payers are spending too much money chasing shadows of unfounded alligations. Microsoft a giant and leader in the industry is spending too much time and effort trying to address the problem. The company could use that effort and money building better products and more job opportunities. We should stop putting all this money into lawyers pockets.

If we don't act soon -- some foreign company will replace Microsoft as the leader and our country will be the loser.
